Cameco Corporation

Well-positioned to benefit from positive trends in uranium

Our view: We are encouraged by increased long-term contracting activity signaling that the contract cycle is gaining momentum, which is a long-term positive for Cameco. We also think the company is well-positioned to benefit from improving trends as utilities increasingly focus on the projected long-term deficit and the importance of origin of supply. We remain neutral, as we view the shares as fairly valued.

Key points:

Contracting cycle coming into focus, expect more to come: We think recent high contract activity, for both Cameco and the market, likely signals that a renewed contract cycle is gaining momentum. Overall, we believe stronger contracting activity and a gradually tightening uranium S&D should support continued improvement in uranium prices over time.

- Utilities are becoming more long-term focused: We think utilities are starting to focus more on the projected long-term market deficit in the late-2020s/early-2030s. Global renewed interest in and government support for nuclear has likely given utilities more confidence to plan longterm. Contract coverage for utilities remains relatively high for the next several years, but contract discussions are turning to longer durations that stretch into the next decade.
- Competition for base-escalated term prices remains elevated: While term market activity has been high, term prices have remained in the \$40-45/lb range, primarily due to significant competition from some sellers that are less economically sensitive. This competition could limit near-term upside in term prices, but high activity means that the lowerpriced competitive pounds should eventually be absorbed.
- Cameco focusing on market-related terms in the out-years: Cameco
 management states that it has not been competing with low-priced term
 business and instead has been focused on market-related long-duration
 contracting. We think this should ultimately benefit the company longterm as Cameco gains leverage to a uranium market set to move into a
 deficit later this decade.
- Origin of supply may start to matter: Rising geopolitical tensions and increasing focus on ESG could mean that origin of supply finally matters to utilities. Recent unrest in Kazakhstan and tensions between Russia/ US highlight potential security-of-supply risks. ESG factors are becoming more important for utilities that adopt sustainable mandates. Cameco should benefit as a stable and proven North American producer, and it should be viewed as a go-to supplier for utilities looking to secure supply.

Maintaining supply discipline even as McArthur restarts: We think Cameco has rightly balanced restarting McArthur below full capacity while dialing back production at Cigar, to ensure a smooth transition in the market. Additionally, a lower production rate at Cigar pushes back a decision and capex on phase 2, which is positive for our valuation.

Reiterating Sector Perform, raising PT to \$30 from \$29: We raise our 2022E and 2023E EBITDA to \$205M and \$468M (from \$184M and \$228M).

Reiterating Sector Perform rating; raising price target to \$30 from \$29

We rate Cameco shares Sector Perform with a \$30 price target. We value the company by applying a 1.75x P/NAV multiple to our NAV estimate. Our P/NAV multiple is above the average historical multiple but in line with multiples during periods of strong investor interest and rising uranium prices. Our DCF uses an 8% discount rate. Our \$30 price target supports out Sector Perform rating.

Key ESG questions

This section is intended to highlight key ESG discussion points relevant to this company, as well as our views on the outlook. Both the questions we highlight and our responses will evolve over time as the dialogue between management, analysts and investors continues to advance. We welcome any feedback on the topics.

Our view

What are the most material ESG issues facing this company?

Cameco produces uranium used to generate nuclear energy. Key ESG considerations are carbon emissions from mining and tailings management, relations with the local indigenous community in Saskatchewan, and acceptance of nuclear as a clean energy source. Additionally, a key ESG issue facing the company would be employee exposure to radiation, given the company's operations. Cameco reports on these factors: in 2020, the company generated 280kt of CO2e (scope 1 & 2, operational share), which was down from 311kt of CO2e in 2019; the average radiation dose was 0.59 mSv, which is well below typical natural background radiation exposure (2–3mSv per Cameco); and it reported no indigenous disputes in 2020.

How does the company integrate ESG considerations into its strategy?

Cameco uses the GRI Global framework, in addition to two corporate indicators that are unique to the company (Public Perception & Employee Radiation Exposure) to measure sustainability performance. Executive compensation is tied to ESG performance through the use of short-term incentives, 50% of which is tied to performance in community initiatives, safety, and environmental goals. Cameco utilizes a Safety, Health, Environment, and Quality management system that is governed by one policy, which can be found on the company's website.

What is diversity like at the board/ management level? 33% (3 of 9) of Cameco's Board of Directors are female while 11% (1 of 9) are Indigenous. Additionally, Cameco has a policy that mandates at least 30% of the BoD be female, and at least one be Indigenous. 20% (1 of 5) of executive officers are female. According to the 2021 Proxy Circular, 28% of the senior management team is female and 6% identify as a visible minority. Across all of Cameco, 25% of the company's workforce are female while 46% are Indigenous. We also note that Cameco has policies in place to promote women in leadership.

Is nuclear, and by extension uranium, considered a clean energy source?

ESG considerations with regard to nuclear energy are, by extension, also relevant to uranium, as it is the primary fuel source for nuclear energy generation. Nuclear reactors produce no greenhouse gas emissions, although there are slight emissions from other parts of the nuclear fuel cycle including construction, mining, conversion, and enrichment. Many countries have incorporated nuclear as a critical part of their overall energy mix and consider nuclear to be a clean and sustainable energy source that is key to meeting climate goals. However, opponents to nuclear as a clean and sustainable energy source cite the potential risk from nuclear accidents, challenges with nuclear waste disposal, and proliferation concerns.

How does Cameco engage the local community?

Cameco operates primarily in northern Saskatchewan, which has a large Indigenous population, and ~45% of the workforce consists of First Nations and Metis people. Cameco has formal agreements with communities in northern Saskatchewan based on workforce development, business development, community investment, community engagement, and environmental stewardship. In 2020, Cameco received the "Towards Sustainable Mining" Excellence Award from the Mining Association of Canada for the Community Based Environmental Monitoring Program, which is part of a collaboration among Cameco, Orano, and local communities to engage the local population in environmental monitoring.

Target/Upside/Downside Scenarios

Cameco Corporation

Source: Bloomberg and RBC Capital Markets estimates for Target

Valuation

We value the company by applying a 1.75x P/NAV multiple to our NAV estimate. Our P/NAV multiple is above the average historical multiple but in line with multiples during periods of strong investor interest and rising uranium prices. Our DCF uses an 8% discount rate. Our \$30 price target supports our Sector Perform rating.

Upside scenario

Our upside scenario of \$36 assumes that uranium prices recover earlier than expected and higher prices are required to incentivize new mine supply. In this scenario, we increase our price forecasts for 2022+ to \$65/lb. We decrease our P/ NAV multiple to 1.5x to account for peak market conditions, and we also assume that the CRA restricted cash is returned, which adds \$1/sh to our valuation.

Downside scenario

Our downside scenario of \$15 assumes that uranium prices take longer than expected to recover and less new mine supply is required due to weak demand. In this scenario, we decrease our price forecasts for 2022-30 by \$5/lb and use a \$40/lb longterm spot price forecast. We decrease our P/NAV multiple to 1.0x to account for more normalized conditions.

Investment summary

We believe the company is well positioned to benefit from an eventual long-term recovery in uranium prices, which we expect to come on the back of growing deficits in the latter half of the decade. In the meantime, strong operations support Cameco's very robust financial position, while the company should also benefit from improving trends in the sector. However, given our view of a longer-term recovery in uranium prices, we view the shares as being fairly valued.

Potential catalysts

Cameco is restarting the McArthur River mine, with some production being added in H2/22 and ramping up to 10.5Mlbs production (15Mlbs 100% basis) by 2024. Additionally, the company will be dialing back production at Cigar Lake to 6.8Mlbs (13.5Mlbs 100% basis) to remain aligned with a disciplined production strategy.

Cameco currently has ~\$300M in restricted cash set aside (along with lines of credit) for the CRA dispute to satisfy rules that require companies to remit or secure 50% of a tax reassessment. Given the positive ruling for Cameco, we think it is reasonably likely that the company would eventually be able to recover the restricted cash.

Cameco and Kazatomprom have restructured the Inkai JV to provide longer-term stability and potential production increases. Production at Inkai JV may increase according to the resource use contract, although the actual production plan is set annually.

Risks to rating and price target

We highlight several key risks and sensitivities that could be potentially material to our thesis on Cameco including: 1) a negative outcome in the ongoing CRA transfer pricing dispute; 2) contract cancellations; 3) potential production disruptions; 4) weaker-than-expected uranium prices; 5) currency volatility, primarily CAD/USD; and 6) a decline in uranium investor sentiment resulting in lower valuation multiples.

Company description

Cameco, headquartered in Saskatoon, Saskatchewan, is focused on uranium mining and nuclear fuel services. The company generated \$1.8B revenue in 2020, with a vast majority coming from the uranium segment. Cameco produces uranium from three major properties that are considered among the best assets globally due to high grades and low costs, and it has potential to increase production over the long term as uranium prices improve.

Required disclosures

Non-U.S. analyst disclosure

One or more research analysts involved in the preparation of this report (i) may not be registered/qualified as research analysts with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets, LLC and therefore may not be subject to FINRA Rule 2241 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Conflicts disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

Please note that current conflicts disclosures may differ from those as of the publication date on, and as set forth in, this report. To access current conflicts disclosures, clients should refer to https://www.rbccm.com/GLDisclosure/PublicWeb/ DisclosureLookup.aspx?entityId=1 or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7.

RBC Capital Markets, LLC makes a market in the securities of Cameco Corporation.

RBC Dominion Securities Inc. makes a market in the securities of Cameco Corporation.

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Cameco Corporation during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-investment banking securities-related services to Cameco Corporation.

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Cameco Corporation during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-securities services to Cameco Corporation.

RBC Capital Markets has provided Cameco Corporation with non-investment banking securities-related services in the past 12 months.

RBC Capital Markets has provided Cameco Corporation with non-securities services in the past 12 months.

Explanation of RBC Capital Markets Equity rating system

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

Ratings

Outperform (O): Expected to materially outperform sector average over 12 months.

Sector Perform (SP): Returns expected to be in line with sector average over 12 months.

Underperform (U): Returns expected to be materially below sector average over 12 months.

Restricted (R): RBC policy precludes certain types of communications, including an investment recommendation, when RBC is acting as an advisor in certain merger or other strategic transactions and in certain other circumstances.

Not Rated (NR): The rating, price targets and estimates have been removed due to applicable legal, regulatory or policy constraints which may include when RBC Capital Markets is acting in an advisory capacity involving the company.

As of March 31, 2020, RBC Capital Markets discontinued its Top Pick rating. Top Pick rated securities represented an analysts best idea in the sector; expected to provide significant absolute returns over 12 months with a favorable risk-reward ratio. Top Pick

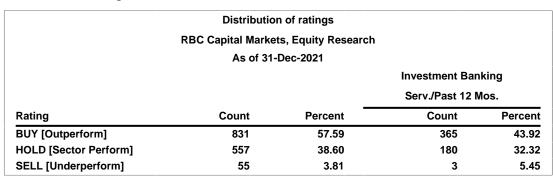

rated securities have been reassigned to our Outperform rated securities category, which are securities expected to materially outperform sector average over 12 months.

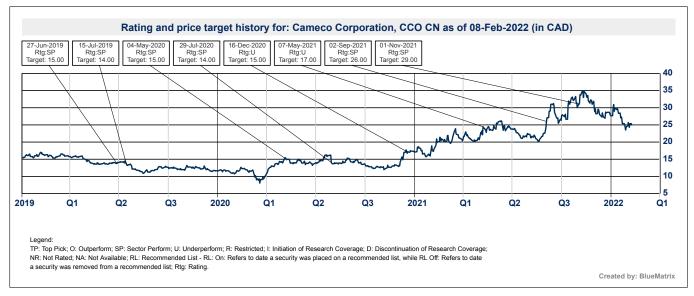

Risk Rating

The **Speculative** risk rating reflects a security's lower level of financial or operating predictability, illiquid share trading volumes, high balance sheet leverage, or limited operating history that result in a higher expectation of financial and/or stock price volatility.

Distribution of ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis.

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by RBC Wealth Management or one of its affiliates. RBC Wealth Management recommended lists include the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Dividend Growth (RL 8), the Guided Portfolio: ADR (RL 10), and the Guided Portfolio: All Cap Growth (RL 12). RBC Capital Markets recommended lists include the Strategy Focus List and the Fundamental Equity Weightings (FEW) portfolios. The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

Equity valuation and risks

For valuation methods used to determine, and risks that may impede achievement of, price targets for covered companies, please see the most recent company-specific research report at www.rbcinsightresearch.com or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7.

Cameco Corporation

Valuation

We value the company by applying a 1.75x P/NAV multiple to our NAV estimate. Our P/NAV multiple is above the average historical multiple but in line with multiples during periods of strong investor interest and rising uranium prices. Our DCF uses an 8% discount rate. Our \$30 price target supports our Sector Perform rating.

Risks to rating and price target

We highlight several key risks and sensitivities that could be potentially material to our thesis on Cameco including: 1) a negative outcome in the ongoing CRA transfer pricing dispute; 2) contract cancellations; 3) potential production disruptions; 4) weakerthan-expected uranium prices; 5) currency volatility, primarily CAD/USD; and 6) a decline in uranium investor sentiment resulting in lower valuation multiples.

Conflicts policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to

https://www.rbccm.com/global/file-414164.pdf

or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

With regard to the MAR investment recommendation requirements in relation to relevant securities, a member company of Royal Bank of Canada, together with its affiliates, may have a net long or short financial interest in excess of 0.5% of the total issued share capital of the entities mentioned in the investment recommendation. Information relating to this is available upon request from your RBC investment advisor or institutional salesperson.

Dissemination of research and short-term trade ideas

RBC Capital Markets endeavors to make all reasonable efforts to provide research content simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets provides eligible clients with access to Equity Research Reports and to SPARC on the Firm's proprietary INSIGHT website, via email and via third-party vendors. SPARC contains market color and commentary regarding subject companies on which the Firm currently provides equity research coverage. Research Analysts may, from time to time, include short-term trade ideas in Research Reports and / or in SPARC. A short-term trade idea offers a short-term view on how a security may trade, based on market and trading events, and the resulting trading opportunity that may be available. A short-term trade idea may differ from the price targets and recommendations in our published Research Reports reflecting the Research Analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that a subject company's common equity that is considered a long-term 'Sector Perform' or even an 'Underperform' might present a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'Outperform' could be considered susceptible to a short-term downward price correction. Short-term trade ideas are not ratings, nor are they part of any ratings system, and the firm generally does not intend, nor undertakes any obligation, to maintain or update shortterm trade ideas. Short-term trade ideas may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any securities or strategies discussed herein. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research.
